

ERIN MOON

WEB DEVELOPER

Summary

I'm a web developer who loves all technology, including consumer gadgets and gaming hardware. I leverage my diverse career background in education, graphic design, to patisserie to inform my programming. When I'm not in front of my computer, you can find me cooking up something delicious for my wife or playing with my cats.

Employment

General Assembly

Seattle, WA

Fullstack Developer

Full-time immersive software development training program. Focuses on full-stack development with JavaScript, Angular, Node.js, Ruby, Rails, HTML, and CSS. Uses Agile methodologies to organize team tasks in project sprints.

Strengths: Front-end design, project ideation, group collaboration, time management

Erin Moon

Freelance Graphic Designer

2003 to 2015

Managed clients and accounts. Conceptualized and designed media for companies. Designs include business cards, logos, advertisements, menus, and packaging designs. Commissioned designs were used by Kokologo in Neiman Marcus stores. Snack bag design used by One Ton Chips, Maebo Noodle Factory. Menu design used throughout the Genki Sushi chain in Honolulu, HI.

Apple

Seattle, WA

Visuals Lead

2011 to 2014

Led a store visuals team to maintain Apple brand standards. Served as a point of contact between Apple Corporate and a visuals support team that ranged between 4 to 25 employees, depending on the project. Projects included storewide launch preparation, merchandising updates, store layout changes, window display construction, graphic asset updates, and daily visuals upkeep.

Apple

Honolulu, HI

Creative

2010 to 2011

Professional software trainer at the Royal Hawaiian Apple Store in Waikiki. Instructed clients on a variety of pro and consumer applications including: Aperture, Final Cut Pro, the iWork Suite, Garage Band, iPhoto, iMovie, and various OS X tasks. Received extensive training in adult education and learning. Mobile device certified.

Activities

Expedia Hackathon · Front end developer

Jan 2016

Participated in a three-day competitive hackathon hosted by Expedia. Completed Prioritize Travel, a MEAN-stack web application that helps people plan and save for vacations. I led the front end development of the project, created the style guide used by the team, and maintained routes between Angular and Express.
